### SUMMARY

Motivated and detail-oriented Computer Science student with proficiency in Java and C programming, and foundational knowledge in Artificial Intelligence concepts. Passionate about building efficient solutions, applying AI-driven approaches, and exploring emerging technologies. Actively seeking an entry-level opportunity or internship to apply my programming and AI skills in real-world projects, contribute to a collaborative tech team, and grow as a developer through continuous learning and hands-on experience.

### EDUCATION

- **B.E. Computer Science and Engineering** 2023-2027  
K S Rangasamy College of Technology - CGPA: 9.2/10
- **HSC** - Adhiyaman Matric School, Uthangarai - Score: 74% 2020
- **SSLC** - SRKV Jain School, Tirupattur - Score: 95% 2018

### TECHNICAL SKILLS

- **Languages** C, Python, Java
- **Frontend** HTML, CSS, Java Script
- **Backend** Spring Boot, Node.js, Express.js,
- **Databases** MySQL
- **Tools** Github, VS Code
- **Soft Skills** Active Listener, Quick Learner, Adaptable, Flexible, Proactive Thinker

### PROJECTS

#### VolunTrack – Enterprise Volunteer & Fundraising Platform

Developed a secure, multi-tier web application to coordinate volunteer activities and charity donations. Engineered a Spring Boot REST API integrated with Spring Security and JWT for role-based authorization, utilizing Spring Data JPA to manage complex relational database schemas. Implemented dynamic dashboard stats, event scheduling, and real-time fundraising progress tracking.

**Technologies Used: Java (Spring Boot), JPA/Hibernate, MySQL, Bootstrap, JavaScript, Maven.**

#### Blood Donation System

Developed a database-driven application to manage blood donations and donor information. The system maintains donor registration, blood stock, hospital requests, and donation history, aiming to streamline the blood donation process.

**Technologies Used: Oracle MySQL.**

#### Weather Forecasting Using Machine Learning

Designed and developed a web-based weather forecasting application using Machine Learning to predict weather conditions from meteorological data. Implemented data preprocessing, feature scaling, model training, and performance evaluation using Decision Tree and Support Vector Machine (SVM). Built an interactive Flask web interface for real-time weather prediction and model comparison.

**Technologies Used: Python (Flask), HTML, CSS, JavaScript, Scikit-learn, Pandas, NumPy, Machine Learning, Decision Tree, SVM.**

### CERTIFICATIONS

- Uipath Certified Professional Automation Developer Associate Certification.
- Certified-Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate.
- NASSCOM Digital Engineering Certification – Gold
- NPTEL- Human Computer Interaction.
- Sales Force - Agentblazer Champion.

### INTERNSHIP

- Java Full Stack Developer Intern – EduSkills (AICTE), Jan–Mar 2026.

### LANGUAGES

Hindi
